

Criteria for Warranty Transfers

All of PPC Solar's installations come with warranties. If you are selling or buying a home or business with solar installed by PPC, give us a call and we'll get started transferring your applicable system warranties to the new owners.

DETAILS

- **Manufacturer Equipment Warranties**

- Manufacturer equipment warranties (solar panels, inverters, racking, etc.) automatically transfer as they are associated to the equipment serial numbers

- **Workmanship Warranty**

- To transfer PPC Solar's Workmanship Warranty to new owners we must do a **system inspection** to confirm our work has not been tampered with in any way. Once this is complete we can provide the new owner with a Workmanship Warranty that will fulfill the system's original warranty term
- We have a **\$250** Warranty transfer fee + hourly rates for system inspection and monitoring reconfiguration

We recommend that the new owner reaches out to us directly after closing to schedule the inspection. At the time of the inspection we also do a "system education" with the new owners and make monitoring changes. Because the online monitoring changes require us to reconnect to the new owners Wi-Fi, we encourage that they only reach out **AFTER** they have had their internet set up.
